

STUDENT VERSION (Week-27)

CLARUSWAY
WAY TO REINVENT YOURSELF

Meeting Agenda

- ▶ Icebreaking
- ▶ Questions
- ▶ Interview/Certification Questions
- ▶ Coding Challenge
- ▶ Video of the week
- ▶ Retro meeting
- ▶ Case study / project

Teamwork Schedule

Ice-breaking

10m

- Personal Questions (Stay at home & Corona, Study Environment, Kids etc.)
- Any challenges (Classes, Coding, AWS, studying, etc.)
- Ask how they're studying, give personal advice.
- Remind that practice makes perfect.

Team work

10m

- Ask what exactly each student does for the team, if they know each other, if they care for each other, if they follow and talk with each other etc.

Ask Questions

20m

1. What are the advantages of Jenkins?

- A. At integration stage, build failures are cached
- B. For each code commit changes an automatic build report notification generates
- C. To notify developers about build report success or failure, it is integrated with LDAP mail server
- D. All of the above

2. What are the useful plugins in Jenkins? (choose three)

- A. Maven 2 project
- B. Anaconda
- C. HTML publisher
- D. Amazon EC2
- E. Sublime text 3

3.What is this command used for?

```
$ sudo docker run -i -t alpine /bin/bash
```

- A. to stop the docker container
- B. to see all running container in Docker
- C. to run the image as a container
- D. to copy the docker container

4. You can't create multiple containers from the same image?

- A. True
- B. False

5. Which of the following commands will merge `branch-a` into the `master` branch?

- A. `git checkout branch-a` and `git merge master`
- B. `git clone branch-a` and `git merge master`
- C. `git checkout master` and `git merge branch-a`
- D. `git branch branch-a` and `git merge master`

Interview/Certification Questions**20m****1. A team is planning to host data on the AWS Cloud. Following are the key requirements:**

- Ability to store data as JSON documents
- High availability and durability

Select the ideal schemaless storage mechanism that should be employed to fit this requirement?

- A. Amazon EFS
- B. Amazon Redshift
- C. DynamoDB
- D. AWS CloudFormation

2. Which of the following are valid integration sources for API Gateway? (choose 3 options)

- A. Public facing HTTP-based endpoints outside AWS network.
- B. Lambda functions from another account.
- C. Database connections on internet outside AWS network.
- D. VPC Link E. SFTP connection

3. You have a web application hosted on AWS VPC with a single EC2 instance with Auto Scaling enabled. You have also assigned elastic IP address to the EC2 instance. When you access the elastic IP address, you are able to successfully connect to your web application. You decided to route requests to your application from a custom domain through Route 53. You have performed the setup on Route 53. However, when you access your custom domain name from the internet, you get "Server Not Found" error. Which of the following could be a reason?

- A. Route 53 service is for internal application routing. It does not support routing traffic from the internet.
- B. You must configure elastic load balancer in order to use Route 53 for web application hosting.
- C. IP address configured in Route 53 DNS record set might be incorrect.
- D. The resource on EC2 instance that you're routing traffic to is unavailable.

4. What is the best way to create Docker images?

5. How Can You Clone A Git Repository Via Jenkins?

Video of the Week

10m

- [Top 7 Cloud Infrastructure Interview Questions](#)

Retro Meeting on a personal and team level

10m

Ask the questions below:

- What went well?
- What could be improved?
- What will we commit to do better in the next week?

Presentation of Coding Challenge

20m

We assume that each group has two sub teams. If this is possible one of the sub teams will present the coding challenge of last week. The other sub team will present the solution to the previous problem of the week. If there is only one sub team then, the sub team will present both of the solutions.

Coding Challenge

5m

- [Find the Non-Repeated Values](#)

Presentation of Case Study of Previous Sprint

20m

We assume that each group has two sub teams. Each week, one of the sub-teams will present their solution.

Case study/Project

10m

Case study should be explained to the students during the weekly meeting and has to be completed in one week by the students. Students should work in small teams to complete the case study.

- [Project-202: Dockerization of Bookstore Web API \(Python Flask\) with MySQL](#)

Closing

5m

-Next week's plan

-QA Session
